## VG Series Granulators

### VG Series Granulators — 20 through 50 HP Models

The VG Series of Granulators are a vertical knife granulator that works well for high volume low density biomass material. These granulators are also designed to work in combination with the other Biomass Briquette Systems products to streamline the material handling process when briquetting solid fuels.

Model	VG-20	VG-30	VG-50
Entrance Capacity (LxW)	16" x 12" (406 x 305 mm)	26" x 12" (660 x 305 mm)	41" x 12" (1041 x 305 mm)
Rotary Cutter (Sets)	6	6	12
Stationary Cutter (Sets)	4	4	4
Output Capacity at 1/2" Chips (Lbs./Hour)	900 - 1500	1300 - 2600	1300 - 4000
Finish Chip Size	3/4" or specify	3/4" or specify	3/4" or specify
Main Motor	20 HP	30 HP	50 HP
Machine Size	64" x 24" x 68" (1626x610x1727 mm)	82" x 52" x 79" (2083x1321x2007 mm)	90" x 70" x 98" (2286x1778x2489 mm)
Machine Weight	2700 lbs. (1225 kg)	3800 lbs. (1724 kg)	6600 lbs. (2994 kg)

Biomass Briquette Systems machinery is sold and serviced in the USA by our mfg representatives/distributors and service network. System design is also available-Call for information.
